WORKSHOP CONTENT 5 DAYS DESIGN ESSENTIALS

If you're in the business of Marketing or Public Relations then we have a workshop that will change your career and for that matter, your life, forever...

Graphic design, also known as communication design, is the art and practice of planning and projecting ideas and experiences with visual and textual content. The form of the communication can be physical or virtual, and may include images, words, or graphic forms.

When we created the Graphic Design Essentials workshop we had a vision to bring what used to be a very exclusive skill to attendees that work within the marketing or PR related fields. Our goal was to make the field of graphic design more accessible, to show ways in which the power of this skill can be harnessed by everybody and not exclusively by people with a degree in design.

In this five day workshop we combine four of our most popular workshops to steer your creative thinking in very exciting new directions. We show you how to create print collateral, ad material, web graphics, posters, banners, exhibition material and even brochures and magazine layouts. As if that's not enough we also include 'The principles of great design' to make sure you understand why a design works.

We conclude the workshop with a look at the future of design as we showcase how to use Creative Cloud and mobile apps to capture ideas for your clients and make them sync with your software.

They say knowledge is power, so be prepared to be blown away at what insight you will have after this incredible journey into the world of design.
