Creative Superpower!

Knowledge is power and the more you know about what is possible the better your chances of attaining phenomenal results!

Creative Cloud

Discover how you and your team can work together more efficiently anytime, anywhere and with no limitations!

Advanced Tools

From advanced vector manipulation to colouring techniques and creating isometric graphics, this course has it all!

Offer Services

With our super showcase, discover new ideas to offer to your client - magic available at the touch of a button!

About the workshop

With the fast-paced changes taking place in design media it is crucial to stay a step ahead in your skill set. Infographics has become the must-have skill for any designer.

In this one day course we take an advanced look at designing Infographics in Adobe Illustrator. Learn everything from the Graph tool regards tracing maps, creating explanatory vector illustrations to simulating 3D effects; as well as putting infographics in perspective. We'll show you everything from advanced coloring techniques to creating complicated storyboards with multiple statistics and storylines. Sharing some secret techniques that will enable you to get the work done efficiently and professionally.

We also take a deep dive into creating 3D infographics using isometric perspectives. Whether you want to learn more advanced skills in Illustrator or create the perfect infograhic, this is the course for you.

What you will learn

- Advanced skills in manipulating vector nodes and creating amazing artwork;
- Advanced colouring methods and creating line art using tracing methods;
- Creating graphs in Illustrator using data from Excel and making it look professional;
- Manipulating existing artwork to get fast, professional results;
- In-depth knowledge of isometric perspectives and how to use them to create the wow factor.
