# UNLOCK YOUR FULL CREATIVE POTENTIAL

## Free Design Software Course

With an abundance of software packages available it's hard to choose the correct one.
In this 2 day workshop we look at 4 packages that's completely **free** and will gear you for any design challenge.

Take an incredible journey through all the facets of graphic design as we explore these creation tools:

**CANVA** (For quick creation of all types of graphics)
Create beautiful designs in minutes. Use Canva's drag-and-drop feature and layouts to design, share and print business cards, logos, presentations and social media graphics.

**Scribus** (For layouts of newsletters and magazines)
Are you an editor or layout artist of a school newsletter or newspaper, or do you just want to know what it means to work in block design or layout?
This module will teach you everything to do with layout, from page structure to creating booklets, books, posters, annual reports and much more in Scribus. Learn about image resolution, colour spaces, placing images for layout and using Scribus to draw vector graphics.

**GIMP** (For editing photographs and creating digital and social media graphics)
GIMP is used for image manipulation (retouching) and image editing, free-form drawing, transcoding between different image file formats, and more specialized tasks. Learn how to edit and manipulated different photos in order to create mind blowing designs

**InkScape** (For creating logos and illustrations of any kind)
Inkscape is a program for creating and editing vector graphics. It is the ideal tool for drawing logos and icons, creating graphics for websites, for composing posters and flyers, or for making patterns for use with cutting machines and laser engravers.

**If you're serious about getting started on your design journey it's imperative that you know all four so don't miss this opportunity to see all the magic!**
